HOW TO CITE: Erratum: Climate and the mfecane. [*S Afr J Sci.* 2014;110(5/6), Art. #2013-0239, 7 pages]. *S Afr J Sci.* 2014;110(7/8), Art. #2013-0239E, 1 page. <http://dx.doi.org/10.1590/sajs.2014/20130239E>

The labelling of Figure 2a was incorrect: the label 35° in the centre of the x-axis should have been 0°. The correct figure appears below.

Source: Hobbs et al.³, p. 10

Figure 2: (a) Schematic of the Hadley circulation over Africa in the form of a vertical cross-section from the surface to 15 km extending along the north/south length of Africa. Ascending air, cloud and rain dominate the equatorial region; descending air, drying and warming dominate the greater part of the continent. (b) The mean surface pressure (mb) and wind (heavy arrows) fields for each season: July, northern hemisphere summer/southern hemisphere winter, and January, northern hemisphere winter/southern hemisphere summer. The Intertropical Convergence Zone (ITCZ) and the Zaire Air Boundary (ZAB) are shown by heavy dashed lines.
